To

Public information officer

The department of Health and family welfare

Nirmal vihar new Delhi

Sub - please give information under rti act

<https://mohfw.gov.in/pdf/FAQsonCOVID19VaccineDecember2020.pdf>

According to this FAQ issued by MoHFW, Vaccination for COVID-19 is voluntary, however it is advisable to receive the complete schedule of COVID-19 vaccine for protecting one-self against this disease and also to limit the spread of this disease to the close contacts including family members, friends, relatives and co-workers.

Pls share efficacy results of Phase I & 2 which prove that Covid-19 vaccine protects against the disease and limits the spread of disease to close contacts

Further, it says that Covid-19 vaccines will be introduced in the country only after the regulatory bodies clear it based on its safety and efficacy

Pls provide all submissions made to DGCI based upon which regulatory body cleared Covid-19 vaccines for safety n efficacy

Finally, ministry says that it is advisable to receive complete schedule of COVID vaccine irrespective of past history of infection with COVID-19. This will help in developing a strong immune response against the disease.

Pls provide details of vaccine study that proves that Covid-19 vaccine will help in developing strong immune response against the disease.

Also pls reply if research has been undertaken on vaccination post disease. Does the study rule out possibility of cytokine storm post disease consequent to increased levels of antibodies post vaccination.

If my information related to different department forward it under articles 6(3) if RTIs act 2005

Yours faithfully.
