

# BEWARE!!!

## KNOW THESE FACTS BEFORE TAKING COVID VACCINES!

**Covid vaccines are still in experimental stage:** Normally, before giving vaccines to people, it must be first tested on animals. Then clinical trials on humans are done to examine the long-term effects, which take at least 5-10 years. However, all the Covid vaccines, whether it is **COVAXIN, COVISHIELD, PFIZER, MODERNA, JOHNSON & JOHNSON or SPUTNIK**, have not been tested on animals and even if they have the data has not been made public. Even the human clinical trials have not been completed: these vaccines have been rushed and given Emergency Use Authorization for mass vaccination with only 6-8 months of Phase I and Phase II trials. Currently people who have taken **COVISHIELD** and **COVAXIN** are participating in Phase 3 clinical trials. The phase 3 trials will be completed in 2023 which means that all of us are now the lab rats being experimented upon.

**You could be infected with Covid even if you have taken the vaccination:** You can even TRANSMIT the Covid virus to others as well. Initially we were told that if we get vaccinated we would not be infected with the virus. Now there's no guarantee that we would not be infected and people who took three doses are also getting infected and dying. Covid cases are escalating by the day in countries such as Israel, UK and Iceland where people have even taken 3 to 4 doses, as well in states of USA such as New Jersey, and Massachusetts. **The W.H.O has itself admitted that natural immunity that comes after being infected with the virus is better than immunity from the vaccine, and is capable of fighting all variants.**

**Covid vaccines are not safe:** We do not know what will be the side effects of these vaccines in the long term. But even in the short term these vaccines have proven to be dangerous. According to the data collected by Awaken India Movement from various news organizations, there have been 12,761 deaths after vaccination in India till end of January. Many people have had sudden heart attacks. Among the 15-18 year old children who were vaccinated between 3rd January 2022 and 20 January 2022 20 children have died of sudden heart attacks within hours/days of taking the vaccination. These vaccines have been linked to Myocarditis (inflammation of heart tissues). **These vaccines even cause blood clots leading to strokes and heart attacks.** Apart from that bell's palsy (facial paralysis), kidney failure, allergies, skin diseases, joint pains, fatigue are some of the other side effects noticed from these vaccines. Covishield in their factsheet have written that major blood clots with decreased platelets can occur as one of the side effects. They've also stated that some unknown and serious side effects may also occur.

**Reporting Adverse /Side Effects:** In India, we have a system to give complaints about the vaccine side effects called AEFI (Adverse Events Following Immunization). However, this process is not properly implemented. It is very difficult to file a complaint about adverse effects. Unfortunately people do not even know whom to report or how to report. People do not even know that they must report the post vaccination deaths. None of the officers bother even if the reporting is done. Because of this there isn't a correct record of people who had side effects or died due to the Covid vaccine.

**P.T.O.**

**Even in the USA** it was noted that only 1% of the actual adverse effects are being reported in their Vaccine Adverse Events Reporting System called **VAERS**. According to that data as of 28th January 2022 a total of 10,88,558 Covid Vaccine adverse effects were reported. Out of that there were 23,149 deaths, 124,445 hospitalizations, 116,726 Emergency Care 9,028 anaphylaxis, 13,575 Bell's Palsy, 3,903 miscarriages, 11,765 heart attacks, 40,069 permanently disabled. **In Europe** as of 29th January 38,983 deaths were reported due to various vaccines and a total of 35,30,362 side effects have been reported.

According to the data given by **VIGIACCESS** a website owned by **WHO** where the adverse effects of all the vaccines are recorded Covid vaccines have caused more damage in just one year from Dec. 2020 to Dec. 21 than all the other vaccines combined from 1968 till 2021. For example the flu vaccine from the year 1968 up to 2021 has recorded 2,72,202 adverse effects whereas the Covid vaccine in one year alone i.e 2020-21 has recorded 24,57,386 adverse effects.

### **Do we need these untested vaccines for a disease that can be cured easily?**

Many allopathic doctors have been treating many Covid patients without any harmful drugs or vaccines. Many doctors across the world have been treating their Covid patients only with high doses of **VITAMIN C** and **VITAMIN D**. In India too, a team of doctors **Dr. Praveen Kumar Saxena, Dr. Sri Sudha Chepyala, Dr. Lalit Kumar Devarao Anand** and **Dr. Digambar Nayak** have proved that covid-19 can be easily cured by using high doses of vitamin C, vitamin D, melatonin and anti fungal treatments. Even complex covid-19 cases were cured with the help of these treatments. This team of doctors submitted a detailed report of their results to **ICMR** asking them to recommend this protocol way back in **November 2020**. However ICMR said that since the randomized trials were not completed this vitamin treatment couldn't be approved. But at the same time vaccines whose trails are not yet completed were approved by ICMR saying that **complete** immunity can be achieved with the vaccines. And now they say that only the impacts of the disease will be lessened with the vaccine.

**IVERMECTIN** too was used by many allopathic doctors successfully to treat covid-19. **And hundreds of studies have proved the effectiveness of Ivermectin**. But the WHO has not allowed this protocol. Studies have also shown that the use of **VITAMIN B3** or **NIACIN** is also highly effective in treating Covid symptoms. Naturopathy has also shown good results using fruits and juices that are rich in **VITAMIN C** and **SUN BATH** (Vitamin D). Even **HOMEOPATHIC, SIDDHA** and **UNANI** treatments have been successful in treating Covid-19 patients from mild to severe cases without any deaths.

### **If Covid is easily curable, why are we being forced to take these Experimental vaccines?**

***Decide if you really need the Covid Vaccine!!!***
