**Hon'ble Mr. Justice N.V. Ramana**  
**Chief Justice of India**

**Your Honour,**

**Re: MoWCD Circular WCD/SJE dated 04-01-2022**  
**REQUEST SUO MOTO COGNISANCE AND THE VACCINATION OF**  
**CHILDREN BE URGENTLY STOPPED**

Suo moto cognisance is humbly requested by us in the context of (a) the written confirmation by the SG to this Hon'ble Court that the vaccines are voluntary. It is inexplicable therefore, how this translates into a mandate, or any form of coercion, by the MoWCD and other authorities, or a rollout, which in its processes is not conducive to obtaining 'informed consent, and (b) Vaccines are unavoidably risky. The status of Covid vaccines under **EUA** (Emergency Use Authorisation), means these Covid vaccines are properly 'experimental', because they are untested, (safety studies are incomplete, and no long term studies have been conducted). Yet, untrue claims of safety, even absolute safety have been made by the WHO and the Government, published in the newsprint and other media. EUA also presupposes that there are no solutions and treatments, (this is untrue), which would negate EUA. There are several treatments, including for example, off-label drugs. These treatments have been actively discouraged by health agencies and the WHO despite their proven efficacy, like the Nobel Prize-winning discovery of Ivermectin, an approved drug with 40 years of safe use and proven in the treatment of Covid (all stages of the disease), HCQ (Hydroxychloroquine) and nutraceuticals. The obvious question is WHY? We provide further data, central to the issue of the safety of these Covid inoculations.

We write, Your Honour, as concerned citizens of India: Dr Banerjee, an epidemiologist of standing and a doctor of Community Medicine and Aruna Rodrigues, Petitioner 1 in the Supreme Court in the public Interest writ (PIL) for a moratorium on GMOs (genetically engineered/modified organisms/crops, to ensure that Indian agriculture is not irreversibly and irreparably contaminated by GMOs, in order to keep our food and animal feed safe).

We write to express our great shock and palpable agony at the contents of the Circular referenced above, which mandates vaccination of children in the age group of 15-18 in Child Care Institutions (CCI) on a "*Priority basis*", (ref. Pr. 2 and 3 of Pg 1 of the letter). We assume that it has occurred to this Ministry, which purports to have a mandate for the development of children, and presumably the 'healthy' development of children, that therefore, such vaccinations will be forced. Since they are in 'care homes', these children are also without parents. It is our fervent hope that the Ministry will not resort to legalese to obtain a 'care-taker's' signature for children in their 'care'. We state at the outset, that the science with regard to the vaccination of children for Covid-19 is very clear; leading medical experts and scientists reject it. The recovery rate from Covid of children is **99.998%** (please ref Pt. 3 below). Children do not die from Covid 19. On the other hand, the vaccines are established to be unsafe and will lead to serious adverse effects and also death. Global data already confirms this. It is significant and will happen in India and will emerge despite the paucity of admitted and published adverse events. We amplify these matters below.

This mandate raises these outstanding concerns:

1. **This is a medical procedure.** And it is being used to violate the foremost Constitutional Right of 'Right to Life', enshrined in the Indian Constitution, which guards the integrity of our bodies. If this right to life is breached, as is proposed, by a forced medical procedure, it simply means the denial of all human freedom. The Nuremberg Code of 1947 was agreed as a result of the horrors that emerged from Hitler's concentration camps including the medical experiments that were forcibly conducted on its inmates. We are clear that this 'Circular' is of an order that similarly raises an inner response of abhorrence and repugnance. We are constrained to say that this circular puts us outside the bounds of civilised society. These children will be experimented upon unless stopped. We reiterate, that given what we now know of the scientific facts with regard to the Covid vaccines, (ref Pts. 4-7) there will be fatalities and injuries among all ages and particularly children. The science absolutely does not support the vaccination of children.

**The Nuremberg Code 1947:** A landmark document that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts. It states:

**“The voluntary consent of the human subject is absolutely essential”.**

“This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity”. (Emphasis added)

## **2. The ICMR Guidelines: ‘National Ethical Guidelines for Biomedical and Health Research Involving Human Participants 2017**

**Status of children:** Children (up to 18 years) are listed among the vulnerable population or groups (ref @ Box 6.2 on Pg 72). Vulnerable persons are defined thus:

Vulnerable persons are those individuals who are relatively or absolutely incapable of protecting their own interests because of personal disability; environmental burdens; social injustice; lack of power, understanding or ability to communicate or are in a situation that prevents them from doing so. (@ Pg 71).

- 3. Global data on Covid Mortality: SARS-CoV-2** has an overall survivability rate of 99.8% globally, which increases to 99.97% for persons under the age of 70, on a par with the seasonal flu. These data have been fleshed out below, which show that children are not impacted by this disease. Through age 19, children and adolescents have a 99.9973% COVID-19 survival rate. This information, which has been a constant throughout the reported pandemic, is reiterated in the most recent (pre-print) analyses by the eminent Stanford

physician, epidemiologist and statistician John Ioannidis, who has been a steadfast critic of COVID alarmism from the very beginning. John Ioannidis data shows that survival rates do not stop with the 19-and-unders. Until people hit their seventies, all age groups have survival rate well over 99%. The majority of deaths are coming from the 0.62% of the population who are in nursing home facilities.

- 0-19: 99.9973%
- 20-29: 99.986%
- 30-39: 99.969%
- 40-49: 99.918%
- 50-59: 99.73%
- 60-69: 99.41%
- 70+: 97.6% (non-institutionalized)
- 70+: 94.5% (institutionalized and non-institutionalized)

<https://childrenshealthdefense.org/defender/covid-health-data-mainstream-media-vaccine-risks/>

These data do not support the global, including Indian policy of mass vaccination. For children vaccination is completely unacceptable. This position is held by the National Technical Advisory Group on Immunisation (NTAGI): "*Children's vaccination should not be a priority now.*" (Dr Jayaprakash Muliyl, Member NTAGI, to the TOI 23 Dec 2021. It is curious therefore, on what basis this conclusion has been ignored.

<https://timesofindia.indiatimes.com/india/advisory-group-opts-for-wait-watch-policy-on-vaccination-of-kids/articleshow/88441808.cms>

4. **Covid Vs Traditional Vaccines:** These COVID 19 inoculations were produced at 'warp' speed of less than 1 year, against the usual 10 years and more for traditional vaccines with which we are familiar. The former are in fact completely different from traditional vaccines. It is important to clarify the difference. Traditional vaccines have been in use for over 4 decades and they form the basis of the trust and acceptance in the general public of traditional vaccines (and this is true of the medical profession too). On the other hand, Covid-19 vaccines are unlike any previous vaccine & have been inadequately studied. The mode of action of all COVID vaccines under EUA utilise a new technology for the production of antigens and involve the Spike Protein of the virus SARS-CoV-2/COVID19. They work in an entirely different way to conventional vaccines and therefore have a radically different set of potential safety concerns. The spike protein of SARS CoV-2 is the causative factor for serious vascular disease in the body and causes disease on its own ie without

the presence of the virus (Salk Institute). All Indian vaccines have or produce the spike protein. Several of them are also mRNA/DNA vaccines

5. **The Robert Malone Interview of 30 Dec. 2021:** This recent interview is of outstanding importance. We therefore, reproduce significant sections of the text<sup>1</sup> of this 3 ½ hr broadcasted interview by Joe Rogan, of this renowned scientist, Robert Malone<sup>2</sup>, among the foremost experts universally, and the Inventor of the mRNA technology. YouTube and Twitter promptly deleted the interview and mainstream media published a rash of articles attacking Malone and Rogan in the most disparaging terms possible.

In response to the obvious Big Tech censorship, Congressman Troy Nehls, R-Texas, entered the transcript of the podcast (the Joe Rogan Experience #1757<sup>3</sup>) into the Congressional Record with the following statement:

*“By deplatforming Dr. Robert Malone for voicing opposition and removing the interview, Twitter and YouTube are once again proving that they don’t work for their users, but for big Pharma, big media, and the elites.*

*When we stray away from our core principles of freedom of speech, freedom of expression, and freedom of debate, democracy is lost. Today, I entered the transcript of the Joe Rogan Experience #1757 into the Congressional Record to preserve the podcast forever. Big Tech may be able to censor information on their own platforms, but they cannot censor the Congressional Record.”*

Malone believes the U.S. government is “out of control” and “lawless” in their COVID response and that their actions have resulted in, probably, half a million excess deaths. COVID jab mandates are “explicitly illegal” as the shots are experimental. What’s more, people are not getting the information they need to be able to make an informed decision about the risks they’re taking by participating in this experiment.

**Suppression of early treatment:** Early treatment with drugs such as hydroxychloroquine or ivermectin is very effective and both drugs have also

<sup>1</sup> <https://media.mercola.com/ImageServer/Public/2022/January/PDF/censored-mrna-vaccine-inventor-tells-all-pdf.pdf> also: <https://childrenshealthdefense.org/defender/physicians-scientists-kids-should-not-get-covid-vaccine/>

<sup>2</sup> **Robert Malone:** Malone has worked closely with the U.S. government for many years. As such, he has kept an open dialogue with colleagues at the U.S. Food and Drug Administration, with whom he discussed concerns about adverse events and the spike protein used in COVID-19 vaccines.

been safely administered for several decades. The Chinese anti-COVID protocol obtained by Malone in February 2020, actually included hydroxychloroquine.

**Malone's stark warning regarding Covid vaccines being administered to children:** Malone highlighted the second **Physicians Declaration** by the International Alliance of Physicians and Medical Scientists, dated October 29, 2021. The declaration has been signed by more than 16,000 doctors and scientists, and states that *“healthy children shall not be subjected to forced vaccination”* as their clinical risk from SARS-CoV-2 infection is negligible and long term safety of the shots cannot be determined prior to such policies being enacted.

### **Summary:**

➤ **“The reason they’re giving you to vaccinate your child is a lie”.**

“Your children represent no danger to their parents or grandparents. It’s actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease. **The risk/benefit analysis isn’t even close.**”

Not only are children at high risk for severe adverse events, but having healthy, unvaccinated children in the population is crucial to achieving herd immunity. The declaration also demands that health agencies and institutions “cease interfering with physicians treating individual patients.”(Emphasis added)

**Warning to Parents:** The Vaccines adverse effects are **“irreversible”** and **“irreparable”**: -- Some excerpts:

*“Before you inject your child — a decision that is irreversible — I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created.*

*There are three issues parents need to understand: The first is that a viral gene will be injected into your children’s cells. This gene forces your child’s body to make toxic spike proteins. These proteins often cause permanent damage in children’s critical organs, including:*

- *Their brain and nervous system. --you can’t fix the lesions within their brain.*
- *Their heart and blood vessels, including blood clots - you can’t repair heart tissue scarring.*

- *Their reproductive system - This vaccine can cause reproductive damage that could affect future generations of your family.*
- *This vaccine can trigger fundamental changes to their immune system- - you can't repair a genetically reset immune system.*

*The most alarming point about this is that once these damages have occurred, they are irreparable:*

*The second thing you need to know about is the fact that this novel technology has not been adequately tested. We need at least 5 years of testing/research before we can really understand the risks. Harms and risks from new medicines often become revealed many years later.*

*As a parent and grandparent, my recommendation to you is to resist and fight to protect your children”.*

## **6. Violation of the Precautionary Principle**

Malone has the full agreement of other leading medical Drs, virologists, pathologists, and scientists, that the spike protein of the vaccines is biologically active and pathogenic, capable of great harm and whose effects are currently visible and as described by Malone above. Given these facts, it is clear that the Inoculations, given their potential to cause irreversible and permanently damaging adverse effects even death, must require the urgent application of the **‘Precautionary Principle’** (which is also an international agreement), to stop the vaccine roll- out to children.

This Hon’ble Court had declared in A.P Pollution Control Board versus M.V. Nayudu [1999 (3) SCC 718]:

“There is nothing to prevent decision makers from assessing the record and concluding there is inadequate information on which to reach determination. If it is not possible to make a decision with ‘some’ confidence, then it makes sense to err on the side of caution and prevent activities that may cause serious or irreparable harm. An informed decision can be made at a later stage when additional data is available or resources permit further research.”

7. **Luc Montagnier with Mr Rubinfeld writing for the Wall St, Journal, Jan 9 2022. ‘Omicron Makes Biden’s Vaccine Mandates Obsolete’**  
<https://www.wsj.com/articles/omicron-makes-bidens-vaccine-mandates-obsolete-covid-healthcare-osha-evidence-supreme-court-11641760009>

**Dr Montagnier** is the *winner of the 2008 Nobel Prize in Physiology or Medicine for discovering the human immunodeficiency virus (HIV)*. *Mr. Rubinfeld is a constitutional scholar.*

With regard to the variant omicron, Luc Montagnier states that there is no evidence so far that vaccines are reducing infections from the fast-spreading variant. In this important article, which addresses the current deliberations in the US Supreme Court, the two authors say:

Federal courts considering the Biden administration’s vaccination mandates—including the Supreme Court at Friday’s oral argument—have focused on administrative-law issues. The decrees raise constitutional issues as well. But there’s a simpler reason the justices should stay these mandates: the rise of the Omicron variant.

It would be irrational, legally indefensible and contrary to the public interest for government to mandate vaccines absent of any evidence that the vaccines are effective in stopping the spread of the pathogen they target. Yet that’s exactly what’s happening here.

--- One [preprint study](#) found that after 30 days the Moderna and [Pfizer](#) vaccines no longer had any statistically significant positive effect against Omicron infection, and after 90 days, their effect went negative—i.e., vaccinated people were *more* susceptible to Omicron infection. Confirming this negative efficacy finding, data from Denmark and the Canadian province of Ontario indicate that vaccinated people have higher rates of Omicron infection than unvaccinated people.

Meantime, it has long been known that vaccinated people with breakthrough infections are highly contagious, and preliminary data from all over the world indicate that this is true of Omicron as well.

**The best policy** might be to let Omicron run its course while protecting the most vulnerable, naturally immunizing the vast majority against Covid through infection by a relatively benign strain. As Sir Andrew Pollard, head of the U.K.’s Committee on Vaccination and Immunisation, said in a recent interview, “We can’t vaccinate the planet every four or six months. It’s not sustainable or affordable.” (emphasis added)

Finally, and in conclusion, given the gravity of the situation, we humbly request you, Your Honour, to appoint a dedicated 5 Member Constitutional Bench (Article 145 (3)), to hear Covid cases on a fast track.

We also, very much hope, given the seriousness of the issues we have raised, and the gravity of harm in evidence that your Honour will find merit in our request for 'suo moto' cognisance of the vaccine rollout and mandates for children and halt them. We are obliged.

Thank you  
Yours faithfully

Dr Amitav Banerjee

and

Aruna Rodrigues
