

SAY NO TO CBDC / E RUPEE: Central Bank Digital Currency

Our government says printing currency uses a lot of precious money which could be otherwise used for better purposes like taking care of the poor etc. Even earlier they were hinting that we should be going towards a cashless society. And therefore they say we need to go for the CBDC or a Central Bank Digital Currency. If indeed we must go for a digital system, we already are using UPI, Net Banking etc. So why again a Digital Currency and how different is this CBDC?

In Case of the existing digital payment methods, the total transactions of the day between two banks are informed to the RBI. The details of each individual transaction are not known to the Central Bank: here in India, which is RBI. Thus, let's say you purchased an item today, the details of your purchase is not known to the RBI. But with CBDC or the E rupee, every transaction details are known to the RBI and in turn to the Central Government as the transaction goes directly via the RBI because of this Central Bank Digital Currency, which is controlled by the RBI. Thus, every transaction that you make will become known to the RBI and to the Central Government.

- THEREFORE, YOUR PRIVACY IS AT STAKE.

Now, let us say, you are giving a donation to a particular organization that is protesting against the government policies, then that transaction could be blocked easily. Or if you are seen to be opposing the government's policies, again your money could be made dis-functional. How Can they do this? Because **this currency is a programmable currency**. Therefore, they can easily program the currency on matters like where all it can be used and for what purposes it can be used etc, using AI and relevant software. Whereas in regular digital payments YOU decide about who to pay and what to pay for etc, in case of the CBDC, the Government decides where and on what you can spend your money on.

- YOU LOSE YOUR RIGHTS OVER YOUR OWN HARD EARNED MONEY.

Now that the government controls your money, it becomes very easy to control YOU. Thus, they can decide if you will have a right to protest against a certain policy or not. Our basic Fundamental Rights such as Right to freedom of Speech, as a citizen to voice our concerns in this democracy given to us by our Constitution can very easily be taken away simply by locking our currency and making it redundant. We are already seeing how difficult it has already become to oppose any policies of the government, and with this CBDC it will be a master stroke for the people in power to gain total control over the citizens.

- OUR BASIC FUNDAMENTAL RIGHTS CAN BE EASILY TAKEN AWAY.

Now linking of Adhaar, PAN and your Bank Account along with CBDC gives complete control over your finances to the government. And coupled with the installation of Facial Recognition software everywhere, tracking your every move becomes very easy. So, citizens must live in constant fear of being watched by those in power as it happens in China right now. So, from being a democracy of for the people, by the people, of the people, we will become a totalitarian system.

- DEMOCRACY IS UNDER THREAT!!!

Not only this, the CBDC is programmable with an expiry date. Let's say you have saved a certain amount of money in your bank. And right now you keep it in fixed deposits and save it for a rainy day and also earn your interest. But with the CBDC, which can be programmed with expiration date, the money in your account will become useless unless you use it within that time frame as decided by the RBI.

-YOU LOSE ALL YOUR SAVINGS & YOU ARE EVEN PREVENTED FROM SAVING!

You may ask, "But why are our own elected representatives doing this?" Good question. If we have noticed since past 2-3 decades especially our governments have made policies based on "recommendations/ diktat" of the World Bank, IMF, WTO, WEF etc international organizations, that gave us loans to implement policies which have actually led us towards more loss of livelihoods, the agrarian crisis, farmers suicides, shutting down of small businesses, vendors, to name a few. Today, these set of organizations that are controlled by some corporations and billionaires like Bill Gates and Klaus Schwab are calling the shots all over the world. And thus, all over the world these policies are being implemented. And all of this is leading towards a NEW WORLD ORDER or A ONE WORLD ORDER / ONE WORLD GOVERNMENT.

Our Sovereignty & Our Freedom is at Stake!

THEREFORE – STAND UP BEFORE ITS TOO LATE

How to Fight CBDC?

- ❖ Use cash for daily needs. Prioritize freedom over convenience.
- ❖ Take legal action against anyone for discriminating against cash payments.
- ❖ Write to the Prime Minister (Postcard, email, twitter, facebook etc) As the Citizen of this Republic You Reject CBDC.
- ❖ Spread this message far and wide!

REJECT CBDC – STOP CBDC
