Teenager dies of heart attack, Delhi doctor blames vaccine

Aarya Bhanushali had taken the COVID vaccine seven days ago, her family says; an MNS worker says it is mysterious that a 15-year-old girl could have died died of a heart attack

Ghatkopar, Mumbai. For the world it's just a death till it happens in your own home to your own child because you chose death over fear. May sweet Arya rest in peace and may she be the reason the world wakes up.

SHIRISH VAKTANIA
mailbag@mid-day.com

AFTER the mysterious death of a 15-year-old girl from Ghatkopar on Wednesday, a doctor from Delhi spread a message on social media platforms claiming she died after taking the COVID-19 vaccine. Her family, however, claimed that she passed away due to a heart attack.

Aarya Rupesh Bhanushali lived with her family at the Himalaya society in Ghatkopar West. On Wednesday morning, she complained of pain in the chest and acidity, her uncle Ashariya Bhanushali told mid-day.

"We gave her soda and cold water, but the pain increased. We immediately called an auto to take her to Disha Hospital in Ghatkopar West. But she suddenly fell unconscious. When we reached the hospital, the

Delhi-based doctor Tarun Kothari who spread the fake message. **PICS/RAJESH GUPTA**

doctor declared her dead, and told us that she died 15 minutes ago of a heart attack," Ashariya said.

Ashariya said a Delhi-based doctor, Tarun Kothari, spread a fake message on the social media platform claiming that Aarya died because of a

reaction from the COVID-19 vaccine. "Aarya had taken the vaccine seven days back and didn't have any side effects. Her death was natural and we don't have any suspicions. Our doctor also told us that Aarya died of a heart attack. We don't have any objection to the vaccine.

"She was a brilliant student and had scored 98 per cent in the SSC preliminary exams. She left us suddenly," the uncle added.

Speaking with mid-day, MNS worker Rajesh Chavan said, "We also received this shocking information through Twitter that a Ghatkopar girl died after taking a vaccine. We found out that the girl died due to a heart attack, as the family said, but she had taken the vaccine seven days ago. We will check with the family and the doctor. It's a serious issue. We will write to the deputy commissioner of police to investigate this matter. The girl was too young and she died of a heart attack. It's mysterious."

Dr Kothari, an MBBS, was unavailable for comment.

10वी कक्षा में पढ़ने वाली साक्षी संभाजी करांडे जिसे टिका लगने के बाद साक्षी की मौत हो चुकी हैं.

AIM Sangli team went to the school in which Sakshi got the vaccine. They met the Principal & discussed about Sakshi who passed away after taking the vaccine. They asked if she was given #InformedConsent but the principal didn't know what that was.

Our team informed her about the legal implications & introduced her to AIM and all the work done by AIM. She called her staff members to listen to the team. They were all surprised when they were informed about the dangers of the vaccine & the deaths and injuries they have caused

The information provided to them was new to them. The team also told them about medical exemptions and ways to detox. They plan to hold a program for the entire school where AIM members can present more information to everyone.

It was a very successful meeting however everyone is saddened by the demise of the young girl, Sakshi

Om Shanti🙏 Saakshi 🙏

12 kids(12-14 years) fell sick after they received #corbevax jab

12 girls fall sick after Covid jab

HUMNABAD (BIDAR), DHNS: As many as 12 kids in the age-group of 12 to 14 years fell sick after they received a corbevax jab at the hostel of Kasturba Gandhi residential School at Janata Nagar under Hudagi gram panchayat on Wednesday.

Corbevax vaccine was administered to 20 girls at the hostel. Of which, 12 girls complained of dizziness and nausea. They were immediately rushed to the taluk hospital. All the girls were discharged after treatment, Chief Medical Officer Dr Naganath Hulsore told *DH*. The block education officer visited the hospital and enquired the well-being of the students.
