

Subject: URGENT – Strong Objection & Denial of Consent for Smart Meter Installation

To:

[Concerned Authority / Electricity Distribution Company]

CC:

[Local Police Station Email ID]

Dear Sir,

This is with reference to your notice regarding the proposed replacement of existing meters with Smart TOD meters.

We, the occupants/consumers hereby place on record our categorical, absolute and unconditional objection to any proposed installation, replacement, removal, handling, touching or interference with our existing electricity meters.

We do not consent and do not grant any permission to the electricity authority, its officers, contractors, agents, employees or any third party to enter our premises or meter area for the purpose of replacing our existing meters with Smart Meters.

Our existing meters are installed within our premises/property and are functioning properly. Any attempt to forcibly remove, replace, touch, disconnect, alter or interfere with the same without our written consent and without following due process of law shall be treated as illegal, unauthorized and strongly objected to.

Our Objections are as follows:

1. No individual consent has been obtained from us.
2. No specific legal provision has been cited mandating compulsory replacement of functional meters.
3. No justification has been provided for replacing existing working meters.
4. No full disclosure has been made regarding:
 - TOD tariff implications
 - Future prepaid conversion

- Billing impact and risks
- Data usage, privacy and security
- Grievance redressal mechanism

5. The statement that installation is “mandated” is vague and unsupported by any legally enforceable provision applicable to us.

STRICT INSTRUCTIONS

You are hereby strictly instructed:

- NOT to enter our premises
- NOT to send any personnel, contractor or agent
- NOT to touch, remove or replace our meters

LEGAL WARNING

Any attempt to proceed despite this written objection shall be treated as:

- Trespass on private property
- Illegal interference with our meters and infrastructure
- Coercive and unlawful action
- Violation of our statutory consumer rights

In such an event, we will be constrained to:

- Lodge an immediate police complaint
- Initiate civil and criminal legal proceedings

against all concerned officers, contractors and authorities, entirely at your risk, cost and consequences.

REQUIREMENT BEFORE ANY FURTHER ACTION

You are called upon to provide the following in writing:

1. Specific legal provision mandating compulsory Smart Meter installation without consent
2. Legal basis for replacing a properly functioning meter
3. Certifications, approvals, testing and safety reports of Smart Meters
4. Written assurance that no coercion, disconnection, forced entry or police involvement will be used
5. Complete disclosure of TOD tariff structure, billing mechanism, and consumer safeguards

Until the above is provided and our written consent is obtained, you are directed to keep the proposed meter replacement on hold.

This email is being sent in advance and with urgency to ensure that no illegal installation attempt is made.

Please find attached relevant documents for your reference.

Regards,
